

Dr. H. KRISHNA MURTY DORA

Dr. Krishna Murty Dora is a distinguished figure in the field of Mechanical Engineering, boasting an impressive educational background and a wealth of experience both in academia and industry. He completed his Bachelor's degree in Mechanical Engineering from Osmania University and went on to pursue a Postgraduate degree in Industrial Engineering and Management from JNTU Hyderabad. Subsequently, he obtained his Doctorate (Ph.D) degree in Mechanical Engineering from Osmania University, Hyderabad.

With over three decades of experience in teaching and industry, Dr. Krishna Murty Dora has made significant contributions to the field of education. He has taught students at both the undergraduate and postgraduate levels in various institutions, imparting his expertise in a wide range of subjects. His rich experience extends to guiding numerous students for their B.E. and M.E. final projects, providing valuable mentorship and guidance.

Dr. Krishna Murty Dora's academic prowess is further evidenced by his prolific research output. He has published a multitude of research papers in various international journals, establishing himself as a respected scholar in the field. Additionally, he has authored chapters in prestigious books, further contributing to the academic discourse in Mechanical Engineering. His innovative spirit is exemplified by the patents he has published, showcasing his commitment to advancing knowledge and technology in his field.

His research interests primarily revolve around Production Engineering and Industrial Engineering within the Mechanical Engineering Department. Dr. Krishna Murty Dora continues to be an enthusiastic researcher and inventor, driven by a passion for exploring new frontiers in his field and making meaningful contributions to the advancement of knowledge and technology.
