network or Internet connectivity, management, business operations and communication possible. Network infrastructure comprises of hardware & software, systems and devices, and it enables computing and communication between users, services, applications and processes. Anything involved in the network, from servers to wireless routers, comes together to make up a system's network infrastructure. Network infrastructure allows for effective communication and service(s) between users, applications, services, devices and so forth.

Project

Deployment of Load balancer & monitoring with AI/ML Tools (Moogsoft).

Roles & Responsibilities

I have been assigned tasks to provide health checks on the network devices. I was responsible for generating health reports and dashboards for several clients. I was part of deployment team where I teamed up with engineers for Planning, Deploying and Implementing new solutions for IT infrastructure.

Technical Aspect

I was part of deployment team, where solutions for IT infra were discussed. Deploying infrastructure like Switches, Routers, Taps & Firewalls for a client. Also I was part of AI/ML monitoring tool for further visibility of the infrastructure.

Solutions

During my first phase of internship I was working on understanding the networking devices and its uses. Soon I was trained on each of the network devices where I use to login to the devices and run multiple health checks and generate reports based on different clients requirements. I was also part of planning and deployment team. Where multiple solutions were discussed and proposed for IT solutions.

Monitoring

Once after the infrastructure is deployed. The next phase is to maintain the infra for any vulnerabilities or failures. Where we mirror the ports and send the traffic to monitoring tool for consecutive updates of the network infra. The

INTERNSHIP COMPLETION CERTIFICATE

Dear Yeseswini,

Excero Services Private Limited certifies that Ms Yeseswini successfully completed the internship program from 01st September 2021 till 31st October 2021 at our headquarters.

Ms Yeseswini displayed professional traits during her internship period and managed to complete all assigned tasks as requested. She was hardworking, dedicated, and committed. It was a pleasure having her with us in this short period.

With best wishes

Yours sincerely,

Director

Excero Services Pvt Ltd

Banjara Hills, Road No. 3,
HYDERABAD-500 034.(T.S.)

Annexure I:

List of various activities learned during her period of Internship as an Software Intern :

Project Name : User Management System (UMS)
Role : Intern
Client : Aartha Solutions, Hyderabad
Team Size : 8
Tools/Environment : Python, MySQL, Django Framework, Java scripting, GIT, CSS, HTML

Technical Skills:

Operating Systems : Windows/Linux
Programming languages : Python developer
Database : MySQL
IDE : Pycharm
Third -party tools : Pylint, Pdb
Version Control : GIT

Project Details:

The general purpose of the User Management System is to provide users with a self-service portal the reviewing and assignment of permissions pto assets. Assets may be physical devices (i.e. laptop computers, mobile phones etc.) or IT services (access to shared drives, software applications etc.).

Involved and gained knowledge in below roles & responsibilities:

- ✓ Understanding the Requirements.
- ✓ Involved in Customer information modules
- ✓ Unit testing on local server and dev server using IIS Server.
- ✓ Testing before deployment.
- ✓ Analyze production issues to determine root cause and provides fix recommendations to the team.
- ✓ Provided application support for the multiple applications.
- ✓ Working with end users to evaluate and solve technical problems
- ✓ Involved in developing different modules and also fixing bugs.
- ✓ Used SQL for modifying, inserting, querying the data in the database.
- ✓ Developed the backend codes using python.
- ✓ Developed the presentation layer and GUI framework that are written using CSS.

PRINCIPAL

Annexure I:

List of various activities learned during her period of Internship as an Software Intern :

Project Title : Online Test Management System (OTMS)
Client : Possibleworks Ltd
Role : Intern
Team Size : 7
Environment : Python, Django, HTML, CSS, JavaScript, MySQL, Git, Linux

Technical Skills:

Operating Systems : Windows/Linux
Programming languages : Python developer
Database : MySQL
IDE : Pycharm
Third -party tools : Pylint, Pdb
Version Control : GIT

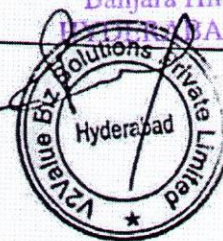

Project Details:

OTMS (Web Application) is a web based test administration and reporting tool. In this application, we can conduct test for campus, training centre and ad hoc test. We can upload the questions and users in this application. It also provides Authentication of User. Test Report can be exported in CSV file. User's details and his answers for all tests can be exported in Excel file.

Involved and gained knowledge in below roles and responsibilities:

- ✓ Requirement gathering and freeze the requirement.
- ✓ Implemented class-based and function-based views for business logic.
- ✓ Created forms and templates as per requirement.
- ✓ Design the database models and created migrations.
- ✓ Developed the Campus drive, training center module and reporting module.
- ✓ Developed the shell script for automation of deployment on server.
- ✓ Written unit test cases for validating Django views and forms data.
- ✓ Involved in effective code-reviews.

Abstract

The key to have a successful and fully functional Network Infrastructure is in the communication with the user/client. The human/machine interaction is crucial for research and development, where I had the honor to spend my first training phase. In my term, many solutions have been proposed for clients and customization of Network Infrastructure. Taking into account, a solution has been proposed to client with load-balancer for seamless traffic channel. This implementation was planned from scratch and has been explained in detail in this report.

Introduction:

Network Infrastructure refers to all of the resources of a network that make

monitoring tool we used for IT solutions was MOOGSOFT. Which is a AI/ML tool which comprises of many features over monitoring a network infra like: CPU, Memory usage, Bandwidth, Audio and Media traffic. Moogsoft stays ahead of almost all vulnerabilities as it exhibits Artificial Intelligence and quick adaptability of the connected devices over the network channel.

Acknowledgement

I would like to thank Muzammil Ahmed(ConnXAI) and my supervisor Mr. Shahbaaz Hussain(MJCET) for allowing me to do my internship with ConnXAI.

This was a great experience where I learned a lot. It helped me explore my skills and increased my interest in Networking and Artificial Intelligence Solutions. Special thanks to ConnXAI Team for being so cordial and assisting me with knowledge transfer. I would also like to thank the engineering team for encouraging me throughout my internship period. I appreciate their patience and help.
